No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                               2240.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The invention relates to new Moraxella bovis antigens and nucleic acid sequences encoding these antigenic polypeptides. The antigenic polypeptides and polypucloctides are useful for raising an immune response in an animal directed against Moraxella, preferably against Mobovis or M. catarrhalis, and for treating Moraxella infections. The present sequence represents the amino acid sequence of the A subunit of the RTX toxin from M. bovis Dalton 2d.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Claim

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  QΥ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Вр
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        QY
                                                                      AAW13866 and AAW13867 represent immunogenic chimeric proteins of the invention. This sequence represents a chimeric protein containing the bovine interleukin-2 (IL-2) sequence and a leukotoxin sequence. The chimeric proteins of the invention comprise a cytokine, selected from II-2 and gamma interferon (gamma IFN), linked to at least one RTX toxin upitope (preferably the sequence shown in AAW13865). The RTX toxin used to provide the epitope sequence is preferably a leukotoxin, especially the full-length Pasteurella haemolytica leukotoxin. Alternatively, the leukotoxin is a truncated leukotoxin lacking leukotoxic activity, especially KT352. The chimeric proteins can be used for the production if vaccines against respiratory diseases such as pneumonia, particularly fibrinous pneumonia caused by P.haemolytica, including shipping fever in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  20-DEC-1993;

Pasteurella species, especially Pasteurella haemolytica, are responsible for respiratory diseases in a range of agricultural animals, most particularly cattle, but also sheep, pigs, horses and fowl. Shipping fever is the most economically important respiratory disease associated with Pasteurella species, affecting 15-30% of exposed cattle and resulting in a 2-5% mortality rate in the exposed population. The vaccine composition of the invention is is useful for preventing or ameliorating respiratory diseases such as pneumonia, particularly shipping fever pneumonia, in livestock. The present sequence represents a fusion protein comprising bovine interleukin-2 (IL-2) and Pasteurella haemolytica leukotoxin, which may also be appeared to the composition of the composition of the composition of the present sequence represents a fusion protein comprising bovine interleukin-2 (IL-2) and Pasteurella haemolytica leukotoxin, which may

IL-2-LKT was gel purified and ligated into the expression vector p6H433 laci. The resulting clone pAA356 (ATCC 68386) contd. the desired gene fusion under the control of the E. coll lac promoter. The protein produced by the gene fusion is useful in a vaccine compsn. with a pharmaceutically acceptable vehicle, e.g. a carrier homologous to a rotavirus VP6 inner capsid protein. The vaccine can be used for preventing or inner capsid protein. The vaccine can be used for preventing or inner capsid protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           WPI; 1992-096901/12.

                                                                                         One or more biologically pure antigenic determinants of the leukotoxin protein comprising of at least six amino acids is a component of a new vaccine for animals. The vaccine elicits an enhanced immune response after challenge with Pasteurella haemolytica. The vaccines other component is a bacterial free culture supernatant derived from a culture of Pasteurella

                                                                                                                                                                                                                                                                                                                                                                                                                                               This sequence represents a fusion between bovine interleukin-2 (IL2) and Pasteurella haemolytica leukotoxin (LTR). The leukotoxin gene, ltkA, was isolated from a gene library of P. haemolytica by chromosome walking. Immunogenic fusion proteins such as this can be used in vaccine compositions. It can also be used to raise mono-

The llppB gene fragment was taken from pMS11. LppB can be used in vaccines for preventing or treating H. somnus infections, which cause thromboembolic meningo-encephalitis, septicaemia, arthritis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Haemophilus somnus immunogenic proteins used in vaccines selected from haemin-binding protein, haemolysin, LppB and selected from haemolysin, haemol
